# 1 Alternative assumption 2a

## 1.1 Original

**Alternative Assumption 1.** *2a Players strictly prefer being matched with players of the opposite sex than a player of the same sex, such that  $u_{i,j,t} > u_{i,k,t}$  for all  $t$ , if and only if  $s_i \neq s_j$  and  $\mathbf{s}_i = \mathbf{s}_j$ .*

## 1.2 Corrected

**Alternative Assumption 2.** *2a Players strictly prefer being matched with players of the opposite sex than a player of the same sex, such that  $u_{i,j,t} > u_{i,k,t}$  for all  $t$ , if and only if  $s_i \neq s_j$  and  $\mathbf{s}_i = \mathbf{s}_k$ .*
